DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5, 6, 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Kubo.

Kubo discloses a sprinkler head comprising: a first housing 1, a second housing 2, a deflector 5 with a valve cap 4 for sealing the first housing 1, a locking unit 3/4/7, a plurality of heat collecting plates 11, 12, a heat responding unit 14 with a fuse metal 17, a head cover 16 (see figure 4), the cover 16 having a disc for collecting heat 16, a heat transmission plate 13, a couple unit 16a/13a, a certain interval (see figure 5), a tooling hole 18

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claim 9-11, 14, 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kubo in view of Simons et al.

Kubo teaches all the limitations of the claims except for a locking hook in the disc. However, Simons et al. discloses a sprinkler head having a disc head cover with a locking hooks 30 (see figure 5). Therefore, it would have been obvious to one having ordinary skill in the art to have

provided the device of Kubo with a locking hook as suggested by Simon et al. Doing so would provide a way to assemble the cover.

With respect to claims 14 and 15, since the limitation "a tool insertion hole" is not positive recited. Therefore the Simmons et al. is capable of covering any tool insertion hole.

4. Claims 10-12, 14, 15, 17, 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kubo in view of Polan (U.S. Patent No. 5,038,616).

Kubo teaches all the limitations of the claims except for a cover member couple to the outer surface of the second housing. However, Polan discloses a sprinkler head having a disc head cover 14 with a female screw portion or rib 78/80 for coupling to the outer surface of the second housing. Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of Kubo with a cover member couple to the outer surface of the second housing as suggested by Polan Doing so would provide a way to assemble the cover.

With respect to claims 14 and 15, since the limitation "a tool insertion hole" is not positive recited. Therefore the Polan is capable of covering any tool insertion hole.

Allowable Subject Matter

5. Claim 13, 16, and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show the art with respect to a sprinkler head: Polan (U.S. Patent No. 4,926,946), Onuki, and Tsuji et al.

Art Unit: 3752

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dinh Q. Nguyen whose telephone number is 571-272-4907. The examiner can normally be reached on Monday-Thursday 6:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Scherbel can be reached on 571-272-4919. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
